EVACUATION DAY WIDELY CELEBRATED.

A STATUE IN MEMORY OF NATHAN HALE UN-VEILED IN CITY HALL PARK-TABLETS SHOWING WHERE THE REVOLUTION-

ARY FATHERS FOUGHT-HIS-TORIC SITES MARKED.

Evacuation Day was made a most interesting anniversary by the ceremonies conducted under the direction of the Sons of the Revolution in commemoration of a number of inspiriting incidents connected with the struggle for American independence. The anniversary celebrates the withdrawal of the troops of King George from Manhattan Island, ten years and a century ago, and it was fitting that the descendants of the heroes who fought against the monarch whose fatuity lost to him the richest heritage of the New World should help to make permanent marks in the city of the noble deeds that are the inspiration of modern patriotism. The day was as glorious as the events it recalled; a cold, bracing air put every one in a holiday humor, and a bright, clear sky smiled down benignantly.

The dawn of the day was hailed by booming cannon from Castle Williams on Governor's Island, and the hoisting of the American flag from the staff in Battery Park maintained an observance which promises to be perpetual. The city was decorated here and there by thoughtful citizens and from the official buildings the National banner shook out its folds. It was only in the lower part of town, however, that decorations were liberal, and this was because here centred the celebrations of the day. The night gave its testimony to the patriotic spirit by a banquet at Delmonico's in honor of the occasion. Six historic tablets were unveiled by the Sons of the Revolution, but the crowning ceremony of the day was the uncovering of the statue to Nathan Hale, the man who made the name of spy synonymous with martyr and patriot in the records of the War for Independence. The spirit of patriotism evoked by the celebrations of the day was a grateful influence upon the public sentiment which is trifled with too often by men in high place who forget the basis upon which the mighty Commonwealth of the United States is

mighty Commonwealth of the United States is founded.

The first tablet unveiled by the Sons of the Revolution was on the spot where the battle of Golden Hill was fought, on January 18, 1770. This engagement occurred at a point now bounded by William, John, Fulton and Gold sts. The place was marked by a house which was erected soon after 1892, in which year the Corporation opened up the streets between Wall and Fair (now Fulton) sts., and from east of Broadway to the East River. The house was used at various times before and during the Revolution as a tavern and coffee house, and it numbered among its patrons George Washington, Lafayette, Steuben, General Putnam and other illustrious men. Its number now, 122 William-st., is kept as a hostlery by Joseph Zelas. The Tablet Committee of the Sons of the Revolution, composed of General Daniel Butterfield, the Rev. Dr. Morgan Dix, Colonel Floyd Clarkson, John Austin Stevens and David Wolfe, met at the historic house and had a holiday jubilation. Here is the inscription on the bronze tablet: the bronze tablet:

Here, Jan. 18, 1770, the fight took place between th Sons of Liberty and the British regulars (16th Foot). First blood shed in the war of the Revolution. Jerome Buck unveiled the tablet on the Washington Building, at No. 1 Broadway, the inscription being:

Here stood the house once occupied by Gen. George Washington and Gen. George Clinton as headquarters

during the Revolutionary war. The tablet at Bowling Green has this record:

Here stood the leaden statue of George III, King of England, was destroyed by the people July 9, 1776, and later made into bullets for the American Army. At the southeasterly corner of Washington and Laight sts. the tablet reads:

To commemorate the landing of Gen. George Washington at the foot of Laight street, North River, accompanied by the troop of Philadelphia City Horse, July 23, 1775, on his way to take command of the American Army At Broadway and Forty-third-st, the tablet

Near this spot, Sept. 15, 1770, the day before the battle of Harlem, Gen. George Washington and Gen. Israel Putnam met and consulted during the movement of

the American Army. The tablet at One-hundred-and-fifty-third-st. and Eleventh-ave, reads as follows:

To commemorate the battle of Harlem, on Sept. 10, 1776. Here Colonel Thomas Knowlton and Major Leitch were so badly wounded that death soon closed their patriotic services for their country.

At about 2:30 p. m. the sounds of military music warned those in charge that the parading column, marching up Broadway, was nearing the statue. A procession, headed by the bester of an immense irel wreath, afterward placed at the base of the statue, was formed. Mayor Gilroy, flanked on either side by Frederick S. Tallmadge, president of the society, and William Gaston Hamilton, chair-man of the Statue Committee, followed the wreathbearer. After them came General O. O. Howard. Collector James T. Kilbreth, the Rev. Dr. Edward Everett Hale, great-grand-nephew of Captain Nathan Hale; the Rev. Dr. Morgan Dix, in full eccledastical robes; the Rev. Dr. D. C. Weston, in university attire; Colonel George B. McClellan, president of the Board of Aldermen; President Abraham B. Tappen, of the Park Board, and probably 500 others. The plaza was crossed, and the grand stand was soon overflowing with members of the society, their wives, daughters and friends. GUESTS ON THE STAND.

The stand had been built to face the statue, and cupied the Broadway sidewalk fronting on the ark between Mail and Murray sts. In the space allotted for the officers, speakers and clergymen, or occupying seats on other parts of the grand stand, were, besides those already named, General Daniel E. Sickles, Cornelius N. The venerable rector of Trinity began his invocation with the Lord's Prayer, in which most on the platform joined. The Episcopal prayer, "Direct us, O Lord, in all our doings, and favor us with Thy continual help," etc.; the Prayer for the Departed, and a special invocation for the Society of the Sons of the Revolution were used.

This statue, commemorating Captain Hair's dying words ("I regret that I have but one life to give to my country"), was designed and modelled by the scupper Frederick Macmounies, a citizen of New-York, residing in Paris, a descendant of the famous American artist, Renjamin West. Handkerchiefs, canes, hats and were waved, and thousands clapped their hands. ADDRESS BY PRESIDENT TALLMADGE.

President Talimadge then, addressing Mr. Hamil-

of the Revolution of the State of New-York, I congratulate you on the successful completion of your labors. Fortuhate indeed has the society been in the composition of your committee, and the future historian who seeks to know the story of this statue will find the names of Hamilton and Jay connected with it—names associated with the early history of your county as defenders of its Constitution. The day we celebrate is anspicious. It is the anniversary of the departure of British troops from our shores at the close of the war of 1776-those same troops who executed Hale. It is Evacuation Day, and it is the day of retribution.

After speaking of Hale's services, Mr. Tallmadge turned to the Mayor and said:

Mayor Gliroy: One thousand three hundred Sons of the stands, sir, with his back to the courts of justice—that justice denied him in the closing moments of his life. His face turned to the multitude who pass him in their daily-walks of life, invites them to pause a while and ask why one who regretted that he had only one life to lose for his of captain. It is the highest rank of unselfish and noble patriots. It is eminently fitting that this monument should be erected in this city, and within a pistel shot almost of where he gave up his life for his country; and you may rest as-sured, gentlemen, that the city of New-York will ever regard this menument as one of its choicest possessions and one of its most venerated treasures. I accept, there-fore, on behalf of the city of New-York, the tender of this monument, and beg leave to return to your patriotic so-ciety our heartfelt thanks for the same.

DR. HALE'S TRIBUTE TO CAPTAIN HALE.

After "Yankee Doodle" had been given by the 1st Artillery band, the Rev. Dr. Edward Everett Hale, of Boston, being introduced by Mr. Tallmadge, spoke as follows:

The occasion, I suppose, is without a parallel in history. Certainly I know of no other instance where, more than a century after the death of a boy of twenty here to do honor to his memory, and to dedicate the statue which preserves it. He died near this spot, saying: "I am sorry that I have but one life to give for my country." THE COLUMBIA'S SUCCESS AND THE CARD TELLING OF IT.

MANY VISITORS TO THE NEW-YORK - THE MARBLEHEAD'S TRIAL POSTPONED-THANKS-

Another victory for the Cramps! And the Cramps appreciate it, too. They even "crow" about it. In one of the offices in the Navy Yard yesterday was seen a placard which did tals crowing. The card bore the date November 18, 1893. This much could be understood by the ordinary reader, but the rest was mystifying and had to be interpreted. On the left side of the card were the pictures of three com-mon steel screws, and over the screws were stamped three Cs-C! C!! C!!! To the right of this was printed "22.81 Knots." Under the screws was the inscription "P. Q.," and under the record of knots "(also P. D. Q.)" was printed. The interpre-tation of all these mystifying letters seems simple when it is known. The "C! C!! C!!!" meant Cramp's Cruiser Columbia, and the three screws indicated that she was a triple-screw vessel. Of course the "22.81 Knots" was her wonderful record, making her the record-holder of warships. The letters "P. Q." recalled the name by which she was commonly known before she received her official name-the known before she received her official name—the newspapers and the people called her the Pirate, shortened from Pirate Queen, and every one knows that "P. D. Q." is a short and emphatic way of saying "with considerable celerity," or "very rapidly." The Columbia certainly is a success as far as her speed in bla certainly is a success as far as her speed is concerned, and it is said that she is destined to be the fleetest warship in the world. Even now, however, when success in securing speed on ships is at its height, the question is raised whether this is ad visable, whether the present system does not do more harm than good. Under the existing system the contractor is required to develop a certain speed in a vessel under penalty of heavy forfeitures of money; but he is practically urged by the Navy Department to do his utmost to develop a phe-nomenal speed by the promise of large rewards in such an event. Thus the attention is devoted largely such an event. Thus the attention is devoted largery to speed, and when the vessel is near completion she is put under a trial that racks her so severely as to do her serious and perhaps lasting injury. A matter of great interest in the Navy Yard was the parade which took place yesterday in honor of the Nathan Hale monument in City Hall Park, New-York. The Navy Yard sent about 600 men for this parade. But on the cruiser New-York there have been other interests, although this was prominent. Twice during the week has the New-York received gifts; on Wednesday two silver candelabra with five branches each were presented by the New-York Board of Trade and Transportation, and on Friday some athletic apparatus, consisting of dumb-bells and cleats for tug-of-war, arrived, being the gift of the New-York Athletic Club. The athletic apparatus was brought to the ship in boxes, and there was no presentation ceremony; it is for the benefit of the crew, thereby differing from the other gifts which has not received the fame that the others have, and that is a six-foot flag and a pennant for the captain's sig, presented by Clarence A. Hart, of Philadelphia. Both flags are made of heavy silk, and the stars are embroidered on the rich field of biue.

It is pieasant for the ship to receive such gifts, and the officers must appreciate the honor to their vessel, but the New-York is not the only vessel to be adorned with gifts speaking of the affection of the citizens. Already the announcement has been made of one gift for the Columbia. A popular subscription will soon he started in the District of Columbia, it is said, so that the citizens may present that ship with a fine sliver service. to speed, and when the vessel is near completion

service.

The work on the New-York is advancing steadily, but the ship has not as yet received any salling orders. The work of supplying the torpedo plant is about finished, and the other ordnance work is well under way. The electric gig for the captain is now being made ready for use. If the stream of visitors is any indication, there is still a lively interest felt in the New-York. On fine days 300 or 400 persons are received on board, and this. It must be remembered, although they have to run the gantiet of various guards and make their way across the ferry and over to the Ordnance Dock.

The Kearsarge was to sall yesterday for New-London, but an order was received postponing her date for reporting there from November 29 to December 4. The trial of the Marblehead, to attend which the Kearsarge is going to New-London, has been postponed, and it is supposed that it has been done on account of Thanksgiving. The Dolphin, which is now in the Navy Yard, is also affected by this change. The work on the Kearsarge can be pushed, and by the time the trial is over she may be in proper condition to be reported ready for sea. After the trial of the Marblehead the Dolphin will probably return to the Navy Yard to receive some repairs which she needs.

The gunboat Machias was heeled over last week, in order that her stability might be tested. On the results of these tests will depend the report of the board of officers which has her case under consideration.

results of these tests will depend the report of the board of officers which has her case under consideration.

The mention Terror was put into the timber drydock yesterday, and will be in the dock several weeks, while her armor plates are being put into position. The training-ship Portsmouth is to be reported ready for sea on Wednesday. She has no orders, but it is thought that she will go to New-London in order to get her complement of apprentice boys, after which she will go to New-London in order to get her complement of apprentice boys, after which she will go to the west indies for her winter cruise.

The officers of the receiving-ship Vermont are taiking about getting up seine sort of a Thanksgiving festivity for the men on the old hull this year. For two years past Lieutenant R. O. Bitler has arranged something of this kind, having some athletic contests and other sports on the veaming amount so fmoney provided by the officers. After the sports the men would go to the ship for a dinner. Many of the men probably would rather go on shore, if their standing permits it, than stay on the ship, and this year no plans had been made for any celebration. Yesterday, however, Lieutenant Hitler had the matter under consideration, and something may yet be done.

The numerous trials of new vessels nowadays give temporary special duty to a good many officers. The board which is to conduct the postponed trial of the Marbiehead consists of Rear-Admiral G. E. Belknap, president; Captain E. O. Matthews, Commander P. H. Cooper, Commander R. B. Baraford, Chief Engineer A. W. Morley, Naval Constructor W. J. Baxter and Lieutenant L. L. Reamey.

The Kendals will be supported by their London company. At the Amphion Theatre "Americans Abroad," a comedy by Victorien Sardeu, adapted by Mrs. Abby Sage Richardson, will be played this week by Daniel Frohman's Lyceum Comedy Company. The play will be presented with the original setting and accessories, and it is expected that it will be received with as much favor at the Amphion as attended its recent presentation at the Columbia. In the company are J. H. Gilmour, J. B. Polk, George Alison, Frederic Congr. R. Jones, Owen Faweett, John Findlay, Vaughn Glaser, Maud Harrison, Gertrude Rivers, Helen Kinnlard, Jane Lothian, Louise Murray, Una Bell and Hope Booth.

In the big chimney of the new Kent-ave, power station of the Brooklyn City Ratiroad Company last evening 118 employes who had helped to erect the bir stack sat down to dinner. The feast was spread in celebration of the completion of the work on the in celebration of the completion of the work on the chimney, a full description of which has already been published. Mr. Harrison, who has had direct charge of the work of construction, ie. the procession through one of the flues into the chimney and was chairman. An orchestra furnished music, and the party did not break up until a late hour, o more visitors will be taken to the top of the chimney, and the outside scaffolding is almost wholly removed. Over \$55,000 was expended on the big stack, and the plant of which it is a part will, when completed, represent an expenditure of over \$55,000,000.
